

CPanel Overview

The Drizzle Hosting, Apache-powered Control Panel (CPanel) is a powerful tool for website management that utilizes a single interface for all of your site management needs. Overall features include:

- **Complete Email Management**
- **Comprehensive Site Statistics**
- **FTP Client**
- **HTML Editing Capabilities**
- **Subdomain Creation and Management**
- **Site Backup Feature**
- **Bulk Mailing List Client**
- **Quick View Site Details**
- **MUCH MORE!**

ACCOUNT MANAGEMENT

You can change or limit access to the backend of the site including CPanel and FTP access. Depending on which hosting platform you have you can add numerous FTP accounts to limit access from other FTP clients. All of our password changing/adding fields are accompanied by an automated password checker to insure your security.

EMAIL ACCOUNTS

The email section of our CPanel allows you to:

- Create multiple domain-based email accounts
- Manage email passwords
- Limit email quotas for specific accounts
- Access webmail
- Create email forwarders
- Auto-configure email clients (such as Outlook)
- Create and execute mailing lists
- MUCH MORE!

FILE MANAGEMENT

The files section of our CPanel enables:

- Quick site file backups
- FTP access
- HTML editing via a WYSIWYG editor
- Appealing and intuitive code editing
- Multiple FTP accounts
- Easy image/document uploading

STATISTICAL INFORMATION

From both the files section and the logs section you can view:

- Disk Space Usage
- Bandwidth Usage
- Access Logs
- Record of the number and type of visitors and where they've been on your site
